CONSERVING FOR THE FUTURE

THE CHALLENGE
How do we identify natural areas to protect for future generations?

As a country of wild open spaces, Canada has the opportunity to become a world leader in conservation, protecting natural areas and providing a safe habitat for species at risk.

A STEP IN THE RIGHT DIRECTION
Scientific studies and Indigenous knowledge help Parks Canada to better understand the importance of natural areas.

THE RESULT?
Tallurutiup Imanga, in Lancaster Sound, is a new national marine conservation area established by the Qikiqtani Inuit Association and the government of Canada. At 108 000 km², it represents 1.9% of Canada’s marine areas.

ARRIVAL

The thing about the Chilkoot Trail that stands out for me is the suddenness of the transitions in the landscape as you move along the trail. Crossing Chilkoot Pass you feel yourself moving from the coast to the interior. Then again. Descending the final hill heading into Lindeman Lake, you experience a peculiar sense of “Arrival” as you leave the harshness of the high country behind and relax into the peaceful ambience of the dry interior forest.
