Visitor Guide
Welcome to Jasper National Park

We respectfully acknowledge that Jasper National Park is located in Treaty 6, Treaty 8 and the traditional territories of the Beaver, Cree, Ojibway, Shuswap, Stoney and Métis Nations. We mention this to honour and thank these nations for their past, present, and future contributions to the protection, preservation and presentation of Jasper National Park.

You are among travellers drawn to the mighty peaks of the Athabasca Valley from the earliest of times. Indigenous peoples, fur traders, railway workers, mountaineers, and more, are part of the rich cultural history of Jasper National Park.

Spanning over 11,000 square kilometres, Jasper is the largest national park in the Canadian Rockies; a place of vast wilderness, majestic mountains, abundant wildlife, outstanding natural beauty and rich human history. Jasper entices visitors from all around the world to travel here, like you.

With your arrival you too are now part of the rich history of Jasper National Park. While you are here, join our friendly Parks Canada staff at the Information Centre, at Parks Canada-led experiences and events, or simply share in a conversation when you see us anywhere in the park.

We are here to assist you and hope your visit is safe, enjoyable, and memorable.

In 2011, the Royal Astronomical Society of Canada (RASC) designated Jasper National Park as a Dark Sky Preserve.

Our commitment to protecting our dark skies in partnership with the town of Jasper and outlying properties over the last 8 years ensures that the natural rhythms of nocturnal animals and humans are protected. This way residents and visitors in Jasper National Park will always be able to experience the wonders of a dark sky.

In 1985 the United Nations Educational, Scientific and Cultural Organization (UNESCO) designated Jasper, Banff, Yoho and Kootenay national parks, as well as Mount Robson, Mount Assiniboine and Hamber provincial parks as the Canadian Rocky Mountain Parks World Heritage Site.

This 29,990 square kilometre site exemplifies the striking natural beauty of the Canadian Rocky Mountains through prominent examples of the glacial and geological processes that shape it. The Burgess Shale in Yoho National Park holds exquisitely preserved Cambrian fossils and continues to give important scientific insights into early life and evolution on earth.

 Protecting Wildlife

Human Food and Garbage Kills Wildlife.

NEVER LEAVE FOOD UNATTENDED.
Wildlife that eat human food or garbage become aggressive with people. This puts both people and wildlife at risk of being hurt or killed.

Wildlife quickly find any food, scented items or garbage that is left unattended.
Once a taste for human food and garbage has developed, they become aggressive in their search for more.

Give Wildlife Space.

DO NOT APPROACH OR ENTICE WILDLIFE.
Following, crowding or startling wildlife can lead to aggressive encounters, which can put you and others in danger. When viewing wildlife:

• Stay at least 100 metres away from bears, coyotes, wolves and cougars.
• Stay at least 30 metres away from elk, bighorn sheep, moose and deer.

If you see wildlife on the road always slow down. Stopping is not recommended for your safety and the safety of wildlife. If you chose to stop:

• Pull over where it is safe to do so.
• Use your hazard lights to alert others.
• Stay in your vehicle.
• Quickly observe, take a photo and move on.
• Move on if a traffic jam develops; it is unsafe for people and wildlife.

KEEP PETS ON A LEASH
• Pets must be kept on a leash at all times.
• Pets attract wildlife and may be attacked if they are left unattended.
• Do not leave pet food out. If you walk away, store food dishes - empty or full. Always store food dishes at night.

Wildlife Identification & Populations

Note: Black bears and Grizzly bears come in a variety of colours.

Jasper National Park

The best way to explore this incredible landscape is to take a day and explore each of its top 5 regions.

1. AROUND TOWN (pg. 8)
Enjoy the wilderness at your door. Hundreds of kilometres of trails, beaches, picnic sites and beautiful vistas are just minutes from town. Walk about, fill your day with activities and let your vehicle rest.

2. MALIGNE VALLEY (pg. 12)
The scenic drive along Maligne Road takes you through one of the most stunning valleys in the park. Visit Maligne Canyon, look for wildlife along the shores of Medicine Lake, gear up for a challenging hike or go for a paddle on Maligne Lake.

3. JASPER EAST AND MIETTE HOT SPRINGS (pg. 14)
Soak in the hottest hot springs in the Canadian Rockies and take a short walk to the source of the springs.

4. ICEFIELDS PARKWAY AND AREA (pg. 16)
Winding 232 kilometres through the heart of Jasper and Banff national parks, the Icefields Parkway has been called one of the most scenic drives in the world. Glaciers, waterfalls, picnic spots and hikes are found along this magnificent parkway.

5. EDITH CAVELL AND WABASSO ROAD (93A) (pg. 20)
The newly revamped Edith Cavell day use area will be open in mid-June sporting improvements to the road, parking lot, main trail and viewpoint. Explore the Path of the Glacier trail or venture higher into the Cavell meadows.

JASPER NATIONAL PARK RED CHAIRS
Discover all six sets of red chairs in the following regions:
- Around Town
- Maligne Valley
- Icefields Parkway and Area
Scope out these picture perfect locations at: parkscanada.gc.ca/jasperredchair #sharethechair

TRAIL RIDER
Helping visitors and residents with mobility challenges access Jasper’s trail network.
trailrider@friendsofjasper.com

JASPER IS A NO DRONE ZONE
Taking off or landing a drone for recreational use is prohibited in Jasper National Park (and may result in law enforcement action and a fine).
**HIGHLIGHTS**

- **Sixth Bridge of Maligne Canyon**: Along the banks of the rushing Maligne River, you’ll find sites with double picnic tables for larger groups.
- **Pyramid Beach**: On the bench lands above town, this laid-back area has secluded picnic sites and stunning views.
- **Lake Annette**: The most popular of Jasper's beaches offering picnic sites, a playground, cook shelters, change rooms and a 2.4 km wheelchair-friendly trail.
- **Lake Edith**: Adjacent to Lake Annette, this quieter area offers picnic sites and views of Roche Bonhomme.

Jasper Information Centre
Located in the heart of Jasper, the Jasper Information Centre National Historic Site is your one-stop shop for information on trails, interpretive programs, activities, suggested itineraries, restaurants, hotels and local services.

**Hours of Operation**

- April 1 – May 15: 9:00 a.m. – 5:00 p.m.
- May 16 – October 9: 9:00 a.m. – 7:00 p.m.
- October 10 – March 31: 9:00 a.m. – 5:00 p.m.

**Friends of Jasper National Park (Located in the Jasper Information Centre)**

The Friends of Jasper National Park is a non-profit organization offering high-quality experiences and opportunities for visitors and locals to connect with the park. Volunteer with the “Friends” to connect with our community and nature. Shop for unique Canadian-made gifts, maps, jewelry and Jasper National Park souvenirs—all proceeds support the park. To learn more visit: friendsofjasper.com

Heritage Firehall
Strike up a conversation with Parks Canada Interpreters at the Jasper Heritage Firehall. Join in free activities for families and travellers of all ages. The Heritage Firehall is downtown across from the Information Centre. Open July and August 2019, see parkscanada.gc.ca/jasper-interpretation for more information.

Jasper Yellowhead Museum and Archives
Travel back in time at the Jasper Yellowhead Museum. Learn about Jasper National Park’s cultural history with exhibits on the fur trade, railway, early exploration and tourism.

Cannabis use in the Town of Jasper
Smoking or vaping cannabis is prohibited in public spaces and buildings within the town boundary. Rules differ between hotels. Ask the front desk where designated areas are.

**Icefields Area**

See full legend on pg. 7
Caribou
Rangifer tarandus
A member of the deer family, they are well-adapted to cold, harsh winters and life in the alpine.
Threatened by Changes to predator populations, human disturbance, habitat loss due to fire and small populations.

Olive-sided Flycatcher
Contopus cooperi
This migrating bird sings a loud three-note whistle of “Quick, Three Cheers!” and tends to perch on top of tall trees while foraging for insects.
Threatened by Habitat loss, declining insect prey and historic fire suppression by humans.

Little Brown Bat
Myotis lucifugus
A small insect-eating bat that often roosts in buildings and can be seen foraging at dusk.
Endangered by White-nose Syndrome, an introduced fungus that grows on the muzzle of hibernating bats, and is causing a rapid population decline across North America.

Haller’s Apple Moss
Bartramia halleriana
Haller’s apple moss is found on shady cliff ledges and rocky mountain slopes. Jasper is home to one of only nine known locations for the rare moss in all of Canada.
Endangered by Fire, human disturbance and small population size.

Common Nighthawk
Chordeiles minor
A diving nighthawk that makes a distinct booming sound like a truck roaring by, caused by air rushing through its feathers.
Threatened by Habitat loss, declining insect prey and fire suppression by humans.

Northern Long-Eared Bat
Myotis septentrionalis
Similar to the brown bat, it has longer ears, a longer tail and bigger wings.
Endangered by White-nose Syndrome.

Common Nighthawk
Chordeiles minor
A diving nighthawk that makes a distinct booming sound like a truck roaring by, caused by air rushing through its feathers.
Threatened by Habitat loss, declining insect prey and fire suppression by humans.

Whirling Disease
Whirling Disease is caused by a parasite affecting salmonid fish. This disease causes nerve and cartilage damage, which may cause infected fish to swirl around in circles. This disease could significantly impact fish populations in Jasper National Park such as Athabasca rainbow trout and pygmy whitefish.

Help protect our waters by making sure you “Clean, Drain and Dry” your boat, kayaks, canoes, paddle boards and fishing gear when you leave a lake or river, and never transport fish between water bodies.
Visit alberta.ca/whirling-disease.aspx for more information.
Pine Beetles: Changing our Landscapes

The pine beetle is a natural part of western North American forests. Beetle populations sometimes swell to outbreaks, but decline when they run out of suitable trees or long, cold winters freeze them to death.

Beetles tunnel into mature pine trees to lay their eggs underneath the bark, carrying along blue-stain fungi that turns tree tissue into food for the larvae. This disrupts the flow of nutrients within the tree, killing it. Needles slowly turn red about one year after a successful beetle attack, then drop off completely in five to ten years.

Large mountain pine beetle outbreaks in BC and Alberta expanded further north and east. In this past, Jasper was too cold for beetles to survive the winter. Without regular fires, forests became less bio-diverse, more disease, and built intense wildfires.

The beetle has colonized an estimated 102,900 hectares of pine. This represents about 30% of lodgepole pine in the park.

It is not uncommon for smoke from wildfires burning outside the park to affect visibility and air quality in Jasper during the summer. Trees dry out faster than live trees.

We will see some areas return to Douglas-fir savannah. There will be more Aspen stands, shrubs, and grasslands, and a greater diversity of plant age and species.

What’s Bugging the Forest?
Location: Athabasca Falls (Spring)

If mountain pine beetle is part of a healthy mountain forest, why are all the trees dead? Park interpreters will lead you on a 100 year journey to discover how our forest became the prime target of pine beetles, how beetles colonize trees, and how it’s definitely not all bad.

Don’t Bug Me! (Mountain Pine Beetle Street Theatre)
Location: Heritage Firehall (Summer)

Have you ever noticed the red pine trees while driving through Jasper National Park? Learn about the beetle that’s causing the disturbance and hear a little from their perspective in this fun variety show.

Trail restoration in progress
In the winter of 2018/2019, trees were removed from mountain pine beetle affected forest on Pyramid Bench (see map page 9) to help protect the town of Jasper from the threat of wildfire. Many trails have been affected by this work and are in the process of being restored. The location and condition of these trails may not be reflected accurately on maps or the trail report. We apologize for the inconvenience.

WANT TO LEARN MORE ABOUT HOW MOUNTAIN PINE BEETLE AFFECTS JASPER’S FORESTS?
Join a Parks Canada interpreter at a program this summer! Park interpreters are storytellers and guides who love to share their passion and knowledge of the park. It’s not all about the beetle! Throughout the season park interpreters are offering programs and guided walks on a variety of topics. Visit parks canada.gc.ca/jasper-interpretation for a detailed list as well as specific times and dates and locations.

Parks Canada Activity Booklets
Xplorer books (kids ages 6 - 11) and Club Parks booklets (kids under 6) help families discover the park and do activities together. Pick up the free booklets at an information centre, campground kiosks or interpretive programs.

Whistlers Campground is closed for the season
When the campground reopens, visitors will be greeted with a new registration centre, 17 new combined washroom and shower facilities, upgraded utilities, improved campsites and wider roads.

MAJOR HIGHLIGHTS INCLUDE:
- Efficient registration with reduced wait times and no car idling
- New combined washroom and shower facilities closer to every campsite
Fort St. James National Historic Site

How to get the most out of your visit:

- Live and learn the life of fur traders and indigenous people who bartered here
- Take the “Escape the Fort” Challenge
- Feed the livestock in a fenced pasture
- Watch the “world class” chicken races
- Try the legendary rack of ribs at the Commemoration Café
- Spend the night in the Murray House and explore 19th century history after hours
- Watch the magical sunset over Stuart Lake
- Bring your tent and camp out under the stars
- Take a picture in the famous Parks Canada red chairs

535 km from Jasper on Highway 16 West (6 hour drive)

Fort St. James National Historic Site

If your visit to Jasper National Park has you heading west along Highway 16 and through Prince George, British Columbia, Fort St. James National Historic Site is a wonderful place to bring your family!

Travel back in time to 1896 and experience Canada’s largest collection of wooden buildings that have been faithfully restored to the fur trade era. A former Hudson’s Bay Company post, this site is situated on the picturesque southern shores of Stuart Lake, BC.

National park laws are designed to protect your safety, and to protect the park for enjoyment by future generations.

NO CAMPFIRES OUTSIDE OF DESIGNATED METAL FIREPITS.
This helps prevent wildfires and keeps the area clean for the next visitor to enjoy. During fire bans, all open fires including campfires and charcoal briquette BBQs are illegal.

NO CAMPING UNLESS IN A DESIGNATED CAMPSITE WITH PERMIT.
Camping is permitted in designated campgrounds only. Camping in roadside pullouts, trailheads and day-use areas is not permitted.

DO NOT FEED OR APPROACH WILDLIFE.
Wildlife are naturally unpredictable. They may not look agitated when approached, but they can act aggressively without warning. Stay in your vehicle when viewing and photographing wildlife along roadsides.

DO NOT COLLECT NATURAL OBJECTS.
Moving or collecting natural objects removes important food sources for wild animals, or shelter that blocks wind or traps water for plants. Building unnecessary rock piles (cairns) is illegal and ruins the natural view for other visitors.

DO NOT ENTER CLOSED AREAS.
Areas of the park are regularly closed for conservation or safety reasons. Stay out of these areas for the safety of yourself and wildlife.

REDUCE DRIVING SPEED IN THE PARK
On average, 100 large animals are killed on the roads in Jasper National Park every year. Obey speed limits.

It is your responsibility to know and follow park regulations. For a complete list of regulations, visit: parkscanada.gc.ca/mtnregulations

Supporting Our Parks

Your park entry fee contributes directly to your experiences within Jasper National Park and supports publications/brochures, rescue services, the maintenance of the Icefields Parkway and the cleaning and maintenance of day-use facilities. Pick up your day pass or annual pass at any gate, information centre or staffed campgrounds.

All youth 17 and under receive free entry into all national parks and national historic sites.
